Computer Service and Repair Rate List

My rates are the same whether I perform the work in home or at my business. However, if I am asked to perform work onsite and nothing is found to be wrong or if do nothing but diagnose the problem I will charge \$25.00 for my travel and time.

Computer Repair and Upgrade Prices:

Please check out www.compudocgr.com for any currently running specials first.

General Diagnosis (Find out what the issues are with the equipment and advise you on your options to proceed from there) **\$25.00**

Clean Inside a Desktop Computer Case (If the computer is overheating, crashing, or presenting other sorts of strange behavior then the fan could be blocked by dust. If a computer overheats then severe damage could result. This damage is often accompanied with the loss of data) **\$35.00**

Clean Inside a Laptop Computer Case (If the computer is overheating, crashing, or presenting other sorts of strange behavior then the fan could be blocked by dust. If a computer overheats then severe damage could result. This damage is often accompanied with the loss of data) **\$45.00**

Complete Computer Operation System Wipe and Reinstall (Includes the installation of the operating system, the backup of files, the installation of updates, and any software titles that were previously installed on the computer) Note: some older software may not be available to reinstall unless you have copies of the original install media. **\$100.00**
*

Data Backup (The initial price is \$30.00 for 1 gigabyte of data, thereafter the rate is \$5.00 per gigabyte of data. If you would like this data copied to DVDs, instead of, or in addition to, a portable hard drive that you provide then add \$5.00 per DVD needed.) **\$30.00**

Data Destruction on a Hard Drive (This is order to ensure that when getting rid of a computer that no one will be able to recover data on the hard drive. Even if the data was erased it can still be recovered unless the hard drive is completely wiped.) **\$40.00**

Data Recovery Failing Hard Drive (The \$80.00 includes 1 gigabyte of data, there after the rate is \$20.00 per gigabyte of data recovered. If it is determined that I cannot recover any data then I will charge \$20.00 for my time.) **\$70.00**

General Computer Cleanup and Tune-up (This includes the installation of all current Windows updates, the removal of unneeded files, the removal of unneeded software, the removal of unnecessary startup programs, the removal of unnecessary devices, and the optimization of the Windows registry.) **\$50.00**

Hard Drive Installation – Additional Storage (This is for the installation of a secondary hard drive into a computer for additional storage space.) **\$35.00**

Hard Drive Installation - New (This is a new hard drive installation with the copying of the operating system from the old hard drive to the new hard drive from the old hard drive. With copying OS from old to new hard drive). **\$65.00**

Hardware Card Install (This is for the installation of: video, sound, network s, modems, **\$25.00**
